    , sneeuw en hagel</h2><div class="box-content"><p>Hier vindt u
    de radarbeelden voor Nederland, Duitsland, Engeland, Frankrijk
    en Europa. Met behulp van de regenradar kunt u zien waar het
    regent, sneeuwt of hagelt. Daarnaast kunt u de intensiteit van
    de neerslag aflezen. Met de regenradar volgt u eenvoudig het
    verloop van de actuele neerslaggebieden.</p></div></div><div
    class="span6"><h2>Hoe functioneert een regenradar?</h2><div
    class="box-content"><p>De radar maakt gebruik van de reflectie
    -en verstrooiingseigenschappen van neerslag. Deze eigenschappen
    stellen de radar in staat om gebieden met regen, sneeuw en
    hagel in kaart te brengen? Doorgaans wordt neerslag in een
    straal van 200 kilometer rond het radarstation gedetecteerd. In
    Nederland worden de beelden samengesteld op basis van de data
    van 2 radarstations. Op deze wijze kan voor heel Nederland
    gedetailleerde neerslaginformatie verstrekken worden. De
    neerslagintensiteit wordt door middel van kleur weergegeven;
    des te donkerder de kleur, des te intensiever de neerslag. Een
    diep donkere kleur geeft bijv. zware regen, vaak in combinatie
    met onweer en hagel, aan.</p></div></div></div><br/>

The X-Cache is used to hasten the process of loading the website for the user. So instead of going to the original servers the clients request is caught by the Content Delivery Network and processed immediately.

The Transfer-Encoding header specifies the form of encoding used to safely transfer the payload body to the user.

Transfer-Encoding is a hop-by-hop header, that is applied to a message between two nodes, not to a resource itself. Each segment of a multi-node connection can use different Transfer-Encoding values. If you want to compress data over the whole connection, use the end-to-end Content-Encoding header instead.

<https://developer.mozilla.org/en-US/docs/Web/HTTP/Headers/Transfer-Encoding>

4

A cache control describes information regarding the expiration of a the resources to that page. For example the timeout for that page due to inactivity.
